

## 1980 Article Index

This complete index of articles and authors covers the various subjects published in *Semiconductor International* in 1980. The listings are by article title under three main categories of Processing, Assembly and Testing. The author index at the end of this section indicates the month in which the author's feature appeared. Reprints are not available for general distribution.

### Processing

- "IC Technology in the Eighties," Mel Eklund, Jan., pg. 29.
- "Production Ion-Beam Milling Equipment," Pieter S. Burggraaf, Jan., pg. 61.
- "Microfabrication by Ion-Beam Etching," Robert E. Lee, Jan., pg. 73.
- "Plasma Deposition Production Trends," Pieter S. Burggraaf, Feb., pg. 23.
- "Square Profile Gold by Pulse Plating," L. Missel, P. Duke and T. Montalbano, Feb., pg. 67.
- "A Novel Submicron Fabrication Technique," T. N. Jackson and N. A. Masnari, Mar., pg. 77.
- "Chemical Reclamation," Ivars Miculs, Apr., pg. 39.
- "High Resistivity Epi May Solve MOS Problems," SI Staff, Apr., pg. 71.
- "Laser Marking Aids High Volume Wafer Production," Apr., pg. 77.
- "E-beam and X-ray lithography for the 1980s," Pieter S. Burggraaf, May, pg. 39.
- "Photoresist Material Update," David J. Elliot, May, pg. 61.
- "Optimization of Photoresist Processing for Step and Repeat Exposure Systems," Thomas P. Shaughnessy and Richard L. Rudell, May, pg. 79.
- "Nearly Perfect Reticles for Direct Wafer Steppers," Harry L. Coleman, May, pg. 95.
- "Photoresist Coated Chromium-on-Glass Substrate Parameters," J. E. Levine and H. C. Schick, May, pg. 105.
- "Mask Making for a Custom VLSI Design House," Christine Coker, May, pg. 125.
- "Marking Systems: Wafers," Timothy G. O'Neill, Jul.-Aug., pg. 81.
- "Lasers in Semiconductor Processing," Pieter S. Burggraaf, Sept., pg. 43.
- "Application of Laser Processing for Improved Oxides Grown from Polysilicon," Giora Yaron, LaVerne D. Hess and Stanislaw A. Kokorowski, Sept., pg. 67.
- "Evaporation Systems Remain Competitive," Timothy G. O'Neill, Sept., pg. 85.
- "Production Oriented MBE Systems," Timothy G. O'Neill, Nov., pg. 57.
- "Recent Developments in Device Fabrication by MBE," Walter S. Knodle and Paul E. Luscher, Nov., pg. 39.
- "Troublesome Aspects of Aluminum Plasma Etching," Brian Chapman and Matthew Nowak, Nov., pg. 139.
- "Overlay in Lithography," H. R. Rottmann, Dec., pg. 83.
- "Clean Room Efficiency: A Combination of Design and Operation," Timothy G. O'Neill, Dec., pg. 49.
- "An Expensive Vacuum Pump Fluid can Save Money for Semiconductor Processors," Dec., pg. 96.

## Our fused quartz makes great tubes, tanks and trays.

We offer a variety of high quality fused quartz products for high temperature, high purity applications in industry. Tubes, rods, tanks, pipes crucibles, etc. Transparent, translucent, or opaque. Both off-the-shelf and custom-designed. All for prompt delivery. Find out all about it. Call or write today.

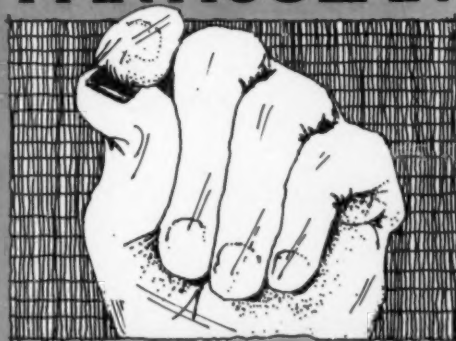

### Thermal American Fused Quartz Company

Route 202 and Change Bridge Road  
Montville, NJ 07045 • (201) 334-7770

Circle No. 174

## PARTICULAR

### ABOUT PARTICULATE?

So Are We! Cleaner than nylon! Nylon gloves vs. our "VC" Clean Room with multiple tests at 3 $\mu$  and 5 $\mu$  channels showed our "VC" vinyl gloves average only 50 lint particles while nylon gloves average 2300 lint particles.\*

\* Particle generation tests comparing "VC" gloves with nylon gloves over particle counter nozzle for 60 seconds.

Also available: Finger Cots & Rubber Gloves.

For further information, call or write:

117

"Packaging and Assembly: The 1980 Semiconductor Technology Forecast," Daniel J. Rose, Jan., pg. 41.

"The Philippines: Asia's New Haven for Semiconductor Assembly," Ron Iscoff, Mar., pg. 69.

"Automatic Wire Bonding Systems," Pieter S. Burggraaf, Apr., pg. 27.

"Substrates for Large Si Chip and Full Wafer Packaging," Koichi Niwa, Kaoru Hashimoto, Nobuo Kamehara and Kyohei Murakawa, Apr., pg. 49.

"Focus on Bonding Tools," Timothy G. O'Neill, June, pg. 59.

"Device Design and Lead Frame Layout Techniques for Automatic Wire Bonding," Mike B. McShane, June, pg. 85.

"Gold Wire for Automatic Bonders," George P. McGill and Larry R. Moore, June, pg. 71.

"Die Separation," Pieter S. Burggraaf, Jul.-Aug., pg. 43.

"Marking Systems: Components," Timothy G. O'Neill, Jul.-Aug., pg. 65.

"Wafer Transport: Key to Automated Die Management," Donald G. Pedrotti, Jul.-Aug., pg. 91.

"Semiconductor Plastic Encapsulants: Molding Compounds," Pieter S. Burggraaf, Oct., pg. 47.

"Improving Thermal Efficiency with the Help of Computer-Aided Circuit Analysis," Ron Cline, Oct., pg. 69.

"Resolution of a Gold Wire Grain Growth Failure Mechanism," Harry K. James, Oct., pg. 95.

"Metal-bonded Dicing Wheels Offer New Approaches to Sawing Microelectronic Materials," Robert C. Cook, Sandy Madden and Harvey Williamson, Dec., pg. 65.

"Successful Encapsulation: Molds and Presses," Pete Burggraaf, Dec., pg. 29.

## Testing

"Testing Trends for the 1980s," John D. Benson, Jan., pg. 55.

"The Value of Photomask Inspection," Pieter S. Burggraaf, Feb., pg. 33.

"Burn-in: A Guide to Systems and Services," John D. Benson, Feb., pg. 49.

"Overalloying of Aluminum-Silicon Contacts Causes Leakage Currents in MOS Devices," Greg Landrum, Feb., pg. 80.

"Failure Analysis Techniques and Failure

Mechanism Utilizing a Plasma Etcher," J. J. Gajda, D. J. DeLorenzo, J. A. Wade, Feb., pg. 83.

"Linewidth Measurement Spotlight," Diana Nyyssonen, Mar., pg. 39.

"Effects of Mask Defects on Reliability and Yield," David Angel and Paul H. Johnson, Mar., pg. 59.

"The Failure Analysis of Random Disturbances in Bipolar RAM Cells," Tom Raymond, Apr., pg. 59.

"Junction Depth Measuring Methods: The Pros and Cons," Carl L. Aley and R. Scott Turner, May, pg. 135.

"Production Mercury Probe Capacitance-Voltage Testing," D. L. Rehrig and C. W. Pearce, May, pg. 151.

"Resistivity Measurement Systems," Pieter S. Burggraaf, June, pg. 37.

"LSI Tester Architecture Improves Productivity," Chris Chrones, Jul.-Aug., pg. 101.

"Evaluating Sputter Target Cracking with Acoustic Emission Techniques," A. B. Cistola, Sept., pg. 103.

"Radiation Testing of Microcircuits," James P. Raymond, Sept., pg. 115.

"C-V Plotting, C-T Measuring and Dopant Profiling: Applications and Equipment," Pieter S. Burggraaf, Oct., pg. 29.

"Characterizing Semiconductor Materials," W. Murray Bullis, Oct., pg. 79.

"Parametric Test Systems for Wafer Processing," Chris Chrones, Oct., pg. 113.

"Understanding Semiconductor Surface Analysis Services," Pieter S. Burggraaf, Nov., pg. 89.

"Testing Metallization Integrity for VLSI Reliability," Owen J. McAteer, Nov., pg. 133.

"Surface Analysis as a Microelectronics Problem Solver," W. Scott Andrus, John A. Buono and Alan W. Wisniewski, Nov., pg. 71.

"Surface Analysis Instrumentation for the Semiconductor Industry," Charles A. Evans, Jr. and Richard J. Blattner, Nov., pg. 109.
